Dear Valene:

I just sent this to David. I have drafted a presentation but could use some help in selecting a Title. I do not have a complete understanding of the background for the talk. I first understood from my manager that it was in some way associated with a course that is being offered. One title might be "Human Health Risks Associated with Perfluorooctanoic Acid Exposures: 2016 EPA guideline for Drinking Water" David told me that you have a place to put my sister and I up for the evening of October 6.

Joyce

Dear David:

EPA has decided that will fund my travel to speak at Bennington College. Can you tell me the time of day when I will be speaking, the duration for the talk and the campus location? I have drafted a Power Point presentation for what I estimate is an hour with time for questions included. What is the setting for the talk? I am technologically limited so I am assuming that there would be someone to set up for the power point for me.

I will also need directions to the college and the campus location where and when I would meet you. My sister and I will be coming from Southamptn MA via Rt 91 and Rt 2 to North Adams. That seemed to be the best way when I looked at the map.

Joyce

I have attached a few more protein papers for you. They are not new, I have had them for a while and they are cited in our HESD.
